Standard Quality All clumps have large ball of earth and foliage of good color. Collected Rhododendron, Kalmia and Andromeda floribunda have at least eight (8) stalks of height stated, and Azalea have at least five (5) stalks of height stated to a clump.

Specimen Quality Specimen Rhododendron, Kalmia, Azalea and Vaccinium Corymbosum have diameter of spread about equal to height with fifteen (15) or more stalks of height stated to a clump.

RHODODENDRON CATAWBIENSE

We advise ordering these in 1 to 5-foot sizes, as the larger sizes have a decided tendency to legginess. We quote specimens in sizes from 5 to 8 feet, but as they are difficult to find, we do not promise them, and particularly request considerable advance notice for selection.

RHODODENDRON CAROLINIANUM

By diligent prospecting we have located limited quantities of this superb species, in the various sizes listed. Nearly all are budded.

AZALEA LUTEA (CALENDULACEA)

We have good tracts located to select from, and can secure any size of excellent quality.

Collected stock of following kinds can be sent in one car:

- From North Carolina
 - Rhododendron Maximum
 - Rhododendron Catawbiense
 - Rhododendron Carolinianum
 - Kalmia Latifolia
 - Azalea Calendulacea
 - Leucothoe Catesbaei

- From West Virginia
 - Rhododendron Maximum
 - Kalmia Latifolia
 - Azalea Calendulacea
 - Azalea Nudiflora

- From Penna.
 - Kalmia Latifolia (limited quantity only)
 - Kalmia Angustifolia
 - Azalea Nudiflora
 - Vaccinium Corymbosum

Below is the approximate number of Standard Quality R. maximum, R. catawbiense and K. latifolia that can go in a 36-foot car by the several ways of packing:

	Single deck	Double deck	Cord-wooded
1 to 2 feet	275	500	1200
2 to 3 feet	200	350	800
3 to 4 feet	175	300	600
4 to 5 feet	150		500
5 to 6 feet	100		300
6 to 7 feet	75		150
7 to 8 feet	50		100

Specimen sizes about 40% less quantity than above.

Double decking car charged at \$8 extra.

ROOTS FOR CULTIVATING

We can supply roots of the several collected plants quoted, for cultivation purposes, and if advised of your probable needs, will call on you, or will write you, to explain what these roots would be, price, and freight rate.

Contracts will be made prior to February 15th for spring delivery, and prior to September 1st for fall delivery.

We will be pleased to have you visit our Nursery to see what has been accomplished there in growing from such roots.

Our efforts are in locating desirable virgin areas, and in collecting, necessarily, some

Contracts will be made prior to February 15th for spring delivery, and prior to September 1st for fall delivery.

We will be pleased to have you visit our Nursery to see what has been accomplished there in growing from such roots.

Our efforts are in locating desirable virgin areas, and in collecting; necessity com-

pels us to go to West Virginia and North Carolina to secure superior stock. The collecting of *Rhododendron* is not a side issue with us, as with many collectors who are storekeepers, lumbermen, etc. whose collecting territory is limited to the section adjacent to their places of business. Our organization has been built up during 16 years of collecting from the mountains of New York, Pennsylvania, West Virginia, Virginia and North Carolina. Our first aim is quality. We have facilities not equalled by other collectors.

UPLAND PEAT (LEAF MOLD)

Difficulty to secure necessary labor and teams at Mount Pocono, and cost of same, compel discontinuance of collecting **Upland Peat**, unless by special arrangement, for the Spring, 1919, delivery. However, we plan to collect and pile a considerable tonnage during the next summer for fall delivery. Price to be determined later.

CULTIVATION ANNOUNCEMENT

We are engaged in the cultivation of transplanted collected Native *Rhododendron*, *Kalmia*, *Azalea*, *Andromeda Floribunda*, *Leucothoe Catesbaei*, et cetera.

In our search for material, we often run across specimens which should not remain in their secluded habitat, but as frequently happens we have no order at that particular time

that will permit of shipment of such plants, we have been compelled to leave them. - We now note such plants and locations, and in our dull seasons prepare and dig them for our cultivation, to the end that our customers can have the opportunity to secure them.

We plan to increase facilities and improve the quality of stock that the trade may secure any quantity, or size.

It gives to the prospective buyer an opportunity to see the stock before shipment, and to select same if he so wishes, with no great loss of time. Stroudsburg is on the Lackawanna Railroad, two hours from New York City, and three and one-half hours from Philadelphia (P. R. R.), and within a short ride of Delaware Water Gap and Pocono Mountains.

If you do not have list of our "ready for sale" nursery stock please write us for same.

The shipping of collected stock will continue as in the past.

IMPORTANT REMINDERS

Customers will bear in mind that our collecting work is necessarily carried on in out of the way mountain sections sparsely settled, and reached by inferior railroads. Our ability to fill orders will be affected by the delay or failure of R. R. companies to furnish us cars, and we accept orders with the full understanding that we are not to be held liable for failure to ship due to inability to secure cars.

We particularly advise placing orders early to be packed in as few cars as practicable.

The earlier an order is placed, the sooner it can be shipped, as orders are filled in the rotation of their receipt, and not from date of inquiries. The fairness of this is manifest. It is a great advantage to the purchaser and to the collector to have orders booked as far in advance of the digging season as possible.

Shipments from North Carolina can commence about March 15th; from West Virginia, April 1st; and from Pennsylvania, about April 15th, or as soon as ground in the Rhododendron woods is sufficiently free from frost to permit of digging.

Shrubbery in car-loads takes 4th class rate, with 16000 pounds minimum weight for a 36-foot box car. 300 to 400 Rhododendron, assorted sizes 2 to 5 feet, usually make minimum weight, but this is not guaranteed, as soil weights vary greatly.

We will be pleased to ascertain freight rate, and probable cost to destination, if advised of your wants.

All claims must be made upon receipt of goods, or at time of planting. After being receipted for by R. R. Co., we can assume no responsibility for their delivery, or any injury caused by delay in transit.

Two per cent. discount allowed for payment in 30 days from date of invoice, if not, interest thereafter will be charged. We reserve the right to cancel orders should financial reports of a customer prove unsatisfactory.

We will be glad to furnish reference, if desired.

Your inquiries and orders are respectfully invited.
